SfiI; CABUT is a cNNA library of Vitis Vinifera cv.
'Cabernet Sauvignon' (Jone 8 dissected buds. Samples were
collected May 13, 2002 from pre-bloom plants (10-11 days
before bloom), pre-veraison. Sampled vines were located at
the University of Callifornia, Davis, Experimental
Vineyard. cDNAs were made by oligo-dT priming and
directionally cloned: 5'and 3' adaptors were used in
cloning as follows:
5'-ANGCAGTGGTATCAACGCAGAGTGGGCCATTACGGCCGGG-3' and
5'-ATCTACAGGCCGAGGGGGGCCACATG-dT(30)NN-3'. Library was
constructed using the Clontech Creator SMART kit and
size-selected to contain the 0.5-3 kb size fraction."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    /clone_lib="Vitis vinifera cv. cabernet sauvignon (Clone

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Solanum tuberosum (potato)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         CK267021.1 GI:39823999
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          four separate sets of plants. Set 1 involved saturation of the soil with 150 mm NaCl and tissues were harvested at following application of the salt stress (leaves: 2hr, 6hr, 12hr, 1d, 2d, and 4d; roots:2hr, 6hr, 12hr, and 2d). Set 2 were grown under the standard conditions and then were water stressed by withdrawal of further watering applications. Drought stressed plants were harvested after cessation of watering (leaves: 3d, 5d, and 7d; roots:3d and 5d). Set 3 were grown under the standard conditions and then were cold stressed by placement at 4 C. Cold stressed leaves were harvested at 2 hr, 6 hr, 12 hr, 1 d, and 4d and roots were harvested at 2 hr, 6 hr, 12 hr, 1 d, 2d. Set 4 were grown under the standard conditions and then were heat stressed by placement at 35 C. Heat stressed leaves were harvested at 2 hr, 6 hr, 12 hr, 1 d, 2d and 4d and heat-stressed roots were harvested at 15 C. Heat 12 hr, 1 d, and 4d and heat-stressed roots were harvested at 2 hr, 6 hr, 12 hr, 1 d, 2d and 4d and heat-stressed roots were harvested at 6 hr, 12 hr, 1 d, 15 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 12 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 12 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 12 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 20 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 20 hr, 1 d, 20 and 4d and heat-stressed roots were harvested at 6 hr, 20 hr, 1 d, 20 and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and 3d and

This full-length cDNA library was generated according to the method described in Nishiyama et al. (2003).

Protonemata were blended by the POLYTRON, and then cultivated on the BCDATG medium for 13-14 days under the continuous light. These clones are available from RIKEN Bio Resource Center (http://www.brc.riken.go.jp/lab/spd/Eng/index.html). The database of Physcomitrella EST clones is available at the PHYSCObase (http://moss.nibb.ac.jp).

A backbone of the vector is basically from pBluescript II (KS),
that was in vivo excised from a 1-FLC phage vector (Carninci et al.
2001). 5' end of the cDNA that was digested with XhoI was ligated
to SalI site of the vector and the 3' end including polyh tail was
ligated to BanHI site of the

/note="Vector: psPoRTI; Site 1: NotI; Site 2: SalI; This
/note="Vector: psPoRTI; Site 1: NotI; Site 2: SalI; This
cDNA library was constructed from mRNA isolated from
somatic embryos (age ranging from 2 months to 9 months)
cultured on MSD 20. The library was prepared using the
life Technologies psuperscript cDNA library construction
kit. Complementary DNA was synthesized from mRNA using a
poly (dT) sequence with a NotI restrictions site. SalI
linkers adapters were ligated to the blunt-ended cDNA
fragments followed by NotI digestion. The cDNA fragments
were directionally cloned into the NotI-SalI restriction
site of the psPoRTI vector. The ligated CDNA fragments
were transformed into E.coli ElectroMax DH10B host cells.
This library was constructed in the laboratory of Dr. Lila
Vodkin by Anu Khanna at the University of Illinois at
                                                                                                                                                                                                                                                                                                                                                                                                                   /organism="Glycine max"

//clone library was constructed from mRNA isolated from somatic embryos (age ranging from 2 months to 9 months) cultured on MSD 20. The library was prepared using the cultured on MSD 20. The library was prepared using the cultured on MSD 20. The library was prepared using the cultured construction wit. Complementary DNA was synthesized from mRNA using a poly (dT) sequence with a NotI restrictions site. Sall linkers adapters were ligated to the blunt-ended cDNA fragments followed by NotI digestion. The cDNA fragments were directionally cloned into the NotI-Sall restriction site of the psPOPRT vector. The ligated cDNA fragments were transformed into E.coli ElectroMax DH10B host cells. This library was constructed in the laboratory of DT. Lila Vodkin by Anu Khanna at the University of Illinois at Urbana-Champaign. e-mail: 1-vodkin@uiuc.edu"

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
